

# SOLOTEX™ ECO-Hybrid

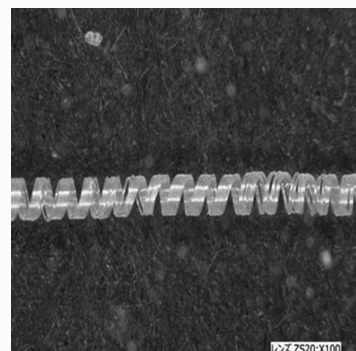

SOLOTEX™ ECO-Hybrid fiber is produced from two environmentally-friendly polymers. Moreover, it possesses a wide range of functionality that makes it comfortable to wear.

PTT polymer from partially  
plant-derived materials

PET polymer from  
recycled materials

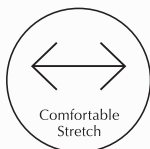

Cross section

Crimp structure

Highly  
ecological

Comfortable  
stretch

Produced from two environmentally-friendly materials,  
one partially derived from plants, and another from recycled material

Crimp structure imparts stretchability

\*SOLOTEX™ ECO-Hybrid is made from two polymers, polytrimethylene terephthalate (PTT) and polyethylene terephthalate (PET).
